Note: This question is part of a series of questions that present the same scenario. Each question in the series holds a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are the Office 365 administrator for a company. You must block any email that appears malicious. Administrators must receive a notification when a malicious email is blocked. You need to configure Office 365. Solution: In Anti-spam settings, you configure the Allowed Sender option. Does the solution meet the goal? A. Yes B. No Answer: B QUESTION 262

Note: This question is part of a series of questions that present the same scenario. Each question in the series holds a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are the Office 365 administrator for a company. You must block any email that appears malicious. Administrators must receive a notification when a malicious email is blocked. You need to configure Office 365. Solution: You run the Microsoft Exchange Online admin audit log report. Does the solution meet the goal? A. Yes B. No Answer: B QUESTION 263

Note: This question is part of a series of questions that present the same scenario. Each question in the series holds a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are the Office 365 administrator for a company. You must block any email that appears malicious. Administrators must receive a notification when a malicious email is blocked. You need to configure Office 365. Solution: You configure an outbound spam policy in Office 365 and enable the Notify specific people if a sender is blocked option. Does the solution meet the goal? A. Yes B. No Answer: A

Explanation: You can configure several company-wide outbound spam settings via the default outbound spam policy. See picture below. References: [https://technet.microsoft.com/en-us/library/jj200737\(v=exch.150\).aspx](https://technet.microsoft.com/en-us/library/jj200737(v=exch.150).aspx) QUESTION 264

You administer an Office 365 deployment. You need to ensure that users can dial telephone numbers by using either the Skype for Business app for Windows or the Skype for Business mobile app. What should you do? A. Run the Windows PowerShell cmdlet Set-CsOnlineVoiceUser. B. In the Office 365 Admin center, enable Skype for Business PSTN Conferencing. C. In the Office 365 Admin center, enable Skype Meeting Broadcast. D. In the Office 365 Admin center, enable Skype Cloud PBX. Answer: D

Explanation: Phone System in Office 365 (Cloud PBX) is Microsoft's technology for enabling call control and PBX capabilities in the Office 365 cloud with Skype for Business Online. Phone System allows you to replace your existing PBX system with a set of features delivered from Office 365 and tightly integrated into the company's cloud productivity experience. Note: To enable calls to landlines and mobile phones, Phone System can be connected to the PSTN in one of two ways: By purchasing Calling Plan--the PSTN calling plan add-on to Office 365. By using on-premises PSTN connectivity, where software on-premises connects with your existing telephony infrastructure. References:

You are a desktop administrator for a company. All desktops have Office 365 ProPlus installed. You need to enable telemetry and configure Office 365 ProPlus telemetry agent settings by using Group Policy. What should you do? A. Create custom reports. B. Configure the Telemetry Processor server. C. Configure the applications to include. D. Turn on privacy settings in the Telemetry Agent. Answer: B

Explanation: Office Telemetry consist of the followings 5 components : A simple network shared folder Telemetry Processor Telemetry database Telemetry Dashboard Telemetry Agent The first 4 components are considered Server-side, while the Telemetry Agent is the client-side. Note: To enable and configure the telemetry agent, you can edit the registry on each monitored client computer in small or test environments. For production environments that contain hundreds or thousands of client computers, you can use Group Policy administrative templates.

You are an Office 365 administrator. You need to share a document with a colleague at another organization. The solution must meet the following requirements:- Share only required information.- Prevent anonymous access.- Allow multiple editors to work on the

document simultaneously. What should you do? A. Send the external user a guest link to the document in a Microsoft SharePoint Online document library. B. Send the external user a guest link to the document in a Microsoft OneDrive for Business instance. C. Share the document by inviting the external user to sign in to your site by using a Microsoft account or a work or school account. D. Share an entire site by inviting the external user to sign in to your site by using a Microsoft account or a work or school account. Answer: C Explanation: Sharing With Authenticated External Users Content can be shared with authenticated external users, meaning guest users are sent an invitation by email and prompted to sign in using an account from a trusted provider in order to access the content in question. Once the invitation is accepted, they are added to your organization's directory as an external user, but will only have access to the specific elements you shared with them. If you've shared an entire site, they'll have access to everything in it, so make sure it doesn't contain sensitive content. References:

All employees in the legal department are members of a security group named Legal-Discovery. You identify the following requirements: - Each member of the Legal-Discovery group must only be able to manage eDiscovery cases they create. - You must use the principle of least amount privilege when granting permissions. - Assign permissions using a default role or role group if one exists. You need to configure the Legal-Discovery group. What should you do? A. Create a custom role group. Add users to the role group. B. Add users to the eDiscovery Manager role group. C. Add users to the Compliance Administrator role group. D. Add users to the eDiscovery Administrator role group. Answer: B Explanation: eDiscovery Managers An eDiscovery Manager can use the Content Search tool in the Security & Compliance Center to search content locations in the organization, and perform various search-related actions such as preview and export search results. Members can also create and manage eDiscovery cases, add and remove members to a case, create case holds, and run Content Searches associated with a case. An eDiscovery Managers can only access and manage the cases they create. They can't access or manage cases create by other eDiscovery Managers. References:

You license Microsoft Teams for most employees. Other employees only have licenses for Microsoft Skype for Business Online. Employees that use Teams must be able to contact other employees by using Skype for Business Online. You need to configure Office 365. Where should you configure the settings? A. Calls and Meetings B. Apps C. General D. Messaging Answer: C Explanation: Interoperability only supports basic chat and calling between Skype for Business and Teams. Configure general settings for one user 1. You must have admin permissions to perform these steps. 2. Sign in to Office 365 with your work or school account. 3. Choose Admin centers > Skype for Business. 4. Choose Users. 5. Choose which users you want to edit. 6. In the right panel, choose Edit. 7. On the General options page, select or clear the check box next to the features you want to change, and then choose Save. Note: To manage the interoperability between Teams and Skype for Business, a new policy called Teams interop policy can be utilized to control where to send chats and route calls, Teams or Skype for Business, and this policy can be configured for all users in the organization (global policy) or applied at the per user basis, manageable through Skype for Business remote Windows PowerShell session using \*-CsTeamsInteropPolicy cmdlets.
